from a common point and moves outward in diverging directions to involve a variety of aspects or perspectives.

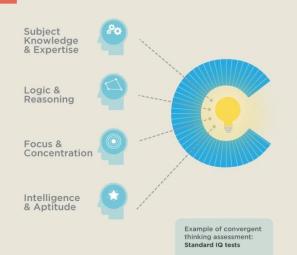

Divergent Thinking & Convergent Thinking

The ability to put a number of different pieces or perspectives of a topic together in some organized, logical manner to find a single answer. It involves focusing on a finite number of solutions rather than proposing multiple solutions.

How do you measure them?

SparcIt

What is IDENTITY?

This project has been funded with support of the European Commission. This publication reflects the views only of the authors, and the Commission cannot be held responsible for any use which may be made of the information contained therein.

Partnering Outside the Box Digital and Artificial Intelligence Integrated Tools to Support Higher Education Students with Dyslexia

IDENTITY

BACKGROUND

FREUD (1856-1939) The unity and totality of the personality, in its conscious and unconscious parts.

KOHUT (1923-1981)

1970s, «Self psychology»:

Identity as a central core of the personality that organises feelings, thoughts and representations of self and others.

This project has been funded with support of the European Commission. This publication reflects the views only of the authors, and the Commission cannot be held responsible for any use which may be made of the information contained therein.

Partnering Outside the Box Digital and Artificial Intelligence Integrated Tools to Support Higher Education Students with Dyslexia

IDENTITY

A function that defines the existence of the person

» What am I»

(i.e. as a sense of existence)

«Who I am»

(i.e. what makes me unique, what makes me worthwhile)

This project has been funded with support of the European Commission. This publication reflects the views only of the authors, and the Commission cannot be held responsible for any use which may be made of the information contained therein.

IDENTITY

Subjective awareness the person has of himself and his experiences, and to a multidimensionality of structural aspects of the self itself (Shavelson et al., 1976).

Three
dimensions
of the
'SELF'

- 1) Real self («as I am at present»)
- 2) Ideal self («as I would like to be»)
- 3) Normative self (« How I should be »)

This project has been funded with support of the European Commission. This publication reflects the views only of the authors, and the Commission cannot be held responsible for any use which may be made of the information contained therein.

IDENTITY

AFFECTIVE ASPECTS

(how I feel and what I feel)

COGNITIVE ASPECTS

(how I represent myself)

This project has been funded with support of the European Commission. This publication reflects the views only of the authors, and the Commission cannot be held responsible for any use which may be made of the information contained therein.

IDENTITY

GENERAL ASPECTS

(I/me as a person)

SPECIFIC ASPECTS

(I/me as a student)

This project has been funded with support of the European Commission. This publication reflects the views only of the authors, and the Commission cannot be held responsible for any use which may be made of the information contained therein.

When your attention goes to yourself while you are working or studying something, does it change anything about what you are doing or how you are doing it?

When you realise you are in the gaze of a group of others, what are your reactions?

This project has been funded with support of the European Commission. This publication reflects the views only of the authors, and the Commission cannot be held responsible for any use which may be made of the information contained therein.

SELF-AWARENESS

Ability to understand oneself and to be able to monitor one's feelings

To recognise one's feelings and emotions as they arise, so as to be able to monitor them and react in the best way

GOLEMAN (1998) Self-awareness is the knowledge and ability to express feelings with openness and assertiveness.

Being self-aware means knowing weaknesses and strengths, understanding what it is possible to improve about oneself and what one must accept in a constructive and critical manner.

Those who possess self-awareness acquire self-confidence and thus have a greater chance of finding personal fulfilment than those who do not possess or cultivate it.

This project has been funded with support of the European Commission. This publication reflects the views only of the authors, and the Commission cannot be held responsible for any use which may be made of the information contained therein.

What is SELF-ESTEEM?

This project has been funded with support of the European Commission. This publication reflects the views only of the authors, and the Commission cannot be held responsible for any use which may be made of the information contained therein.

SELF-ESTEEM

BACKGROUND

JAMES (1842-1910) The relationship between the perceived self and the ideal self

Sense of self-worth derives from the relationship between success and expectations

(1902)

MEAD (1934)

« Looking-glass self »

Self-esteem may be more strongly associated with the perceived appraisals of others than with actual appraisals

« Role-taking »

SELF-ESTEEM

- Evaluation that an individual makes and maintains of himself, including judgments of approval and disapproval. It indicates how capable, significant, skilled an individual considers himself to be.
- > The sum of what is attributed by others about you and yourself.
- > Self-esteem can be broken down into different components (and sub-components), while for others, self-esteem is a general attitude, the evaluative component of self-concept (Fleming & Courtney, 1984).
- > Attitude directed towards a particular object, namely oneself (Rosenberg, 1965),
